# INTRODUCTION

01

The UNIV Nigeria Conference is a conference for tertiary institutions. It promotes critical thinking and practical dialogue on the major issues confronting society, particularly young people. It focuses on ensuring that all the participants actively get practical knowledge to make lofty ideals a reality in all aspects of their lives, thereby definitively improving themselves and their environment.

Please keep in mind the main purpose of the UNIV Nigeria conference when implementing the guidelines outlined in this document. It, like its parent entity UNIV Forum, seeks to broaden horizons, exchange ideas, and engage in constructive reflection on the most pressing issues for today's youth and society. This is accomplished by providing an experience in which their ideas can be realized and grown, starting from the preparations to the conference itself.

With this in mind, please feel free to read through these guidelines for UNIV Nigeria 2024.

# CONFERENCE PREPARATIONS & PARTICIPATION

This year will feature 2 major participation avenues for attendees:

## **1. Paper Submission and Presentation:**

Participants are invited to submit scholarly papers aligned with the thematic focus of the UNIV. Submitted papers will undergo a rigorous selection process, with accepted papers affording participants the opportunity to present their research at the conference.

## **2. Case Study Analysis:**

Participants will engage in dynamic group discussions centered around a case study pertinent to this year's conference theme. Each group will dissect the case, offering insightful analyses and recommendations reflective of their collective expertise and perspectives.

Every participant will be shared out into the case study groups after registration for the conference. The members will be randomly assigned.

- The members of each group will have the opportunity to study and discuss the case provided ahead of the conference day.

- They will then plan and decide on the person(s) to present the findings for them during the conference. They would also have the opportunity to meet as a group on the day of the conference to finalize the details for their assigned case study.

# CONFERENCE PREPARATIONS & PARTICIPATION

It is STRONGLY ADVISED that each University Centre should organize in-house events before the time of the conference. This will generate awareness, aid in choosing student speakers and help them hone their skills.

To ensure the quality of the papers and presentations, please use the paper preparation and presentation tips at <https://univforum.org/en/univforum/actividades/comunicaciones/consejos-practicos-para-preparar-una-comunicacion/> and the bibliography at <https://bit.ly/univbiblio>. The speaker is to make certain that he actually studies the materials in the bibliography. This is to be highlighted in the content and quality of his papers and presentations.

These tips provided for TED talks (**Non-illustrated** and **Illustrated**), when adapted, may prove very helpful for the speakers.

- Every potential student speaker would need a paper on his chosen topic in both '.pdf' and '.docx' (alternatively '.doc' or '.rtf') format, the powerpoint presentation and a 2-minute video summary of his presentation.

- The paper needs to be between 1,200 and 2,000 words in length. The presentation will be presented orally at the conference in 10 – 12 minutes, with a question session of 8 – 10 minutes.

- Each student speaker would have an affiliated Centre serving as his guarantor and a specific representative in that Centre overseeing his work.

- The purpose is to make sure that the research work and presentation is up to standard. However, it must be the work of the student. This is an excellent opportunity for the person to learn virtues involved in working well.
